NEW LISTING!!!

Ocean racer Ted Irwin put his extensive sailing experience into designing and building bluewater sailboats during a three-decade span, influencing U.S. yachting in the process. He started with several successful one-design ocean racers in the early 1960s before founding Irwin Yacht and Marine Corp. in St. Petersburg, Fla., in 1966. The company grew into one of the most successful boatbuilders in the country, turning out thousands of Irwins into the 1990s. At one time, Irwin Yachts had as many as 15 models in production. The original Irwin 43 came out in 1971 and was updated in 1985 and offered as the Mk II. Irwin halted production in 1991.
