Description

Here's one of Bob Perry's favorite sweet sailing designs. Sporting Perry's prettiest stern, Impulsive is a Nordic built Esprit 37. Later models were called Valiant Esprit 37s. With a Monitor Windvane, Siemens Solar Panels, Air-X Wind Generator, and 45# Rocna Vulcan Anchor you know this is a boat that wants to be "out there". Owner has to move out of state and wants this boat sailing. Lots more details coming, meanwhile enjoy the pics, let's sort schedules, and get you aboard. Thanks, Lee

Survey Description

In profile Impulsive has a straight stem, fin keel, skeg-hung rudder, gently sprung sheer, and canoe stern. The hull underbody is round with a gentle turn-of-the-bilge. Forward sections are V-shaped while midship and aft sections are shaped like a wineglass. The ballast is externally mounted lead. A low trunk-cabin fills the middle half of deck. The exposed aft cockpit is surrounded by a coaming. The vessel's topsides are white gelcoat with a baby blue cove-stripe, decks and cabin-sides are white with glued-on grey tread, the boot-top is navy blue, and bottom is black antifouling.

Construction

Impulsive was built for Valiant Yachts by Nordic Yachts. The hull is reportedly hand-laid with four layers of 1.5 oz mat alternating with eight layers of 24 oz woven roving. The ballast is attached to the hull with 5/8" stainless steel J-bolts that are cast into the lead. The deck fiberglass-sandwich construction with balsa core. The hull-to-deck joint is shoebox style construction.

Interior

The vessel is laid-out from bow to stern as follows: farthest forward is the anchor locker accessed through the forward cabin. In the forward cabin is a raised V-berth with stowage beneath. An enclosed head and shower are aft of the V-berth and to port. On starboard is built-in cabinetry for stowage. The mainmast passes through deck to a mast-step in the center bilge. The main salon lies midships with an L-shaped dinette to port, galley to port-aft, a straight settee on starboard, and navigation station and quarterberth to starboard-aft. Centerline steps lead to the cockpit and can be removed for engine access.

Masting and Rigging

Impulsive is a masthead sloop. Spars are painted extruded aluminum. The mast employs a single spreader. Standing rigging is a mix of 1x19 stainless steel wire and rod rigging. Stainless steel chainplates pass through deck and are secured below. The stainless steel stem fitting is externally mounted while the backstay is attached to a stainless steel chainplate that passes through deck aft of the cockpit. The vessel can be cutter-rigged with the deployment of a solent stay, but was not rigged as such at the time of survey. The heads'l is roller furling. All lines are led to the cockpit.
